

## Compliance & Material Overview

Document positions for IP rating, RoHS, REACH and material information. Use this page honestly until real supplier files are received and verified.

---

### **IP68 / IP69K**

Request original test report or datasheet from selected supplier. IP claims should be tied to part number, cable diameter range, O-ring use and installation torque.

### **RoHS**

Request supplier declaration for RoHS Directive controlled substances. Keep the signed declaration or test report in your records.

### **REACH**

Request REACH SVHC declaration with date/version. Confirm no SVHC above reporting threshold or disclose if applicable.

### **Material statement**

Request body material, seal material, O-ring material, membrane material for vent plugs, and flame rating where claimed.

## Website wording recommendation

Use "Documents available on request" until real files are in hand. Do not publish borrowed certificates or imply factory ownership unless you have written authorization.
